WORKTABLE

Everyone has his own place at home- a place for rest. However, we all meet by the table- dining room is the heart of every house. We sit by the table and have meals together, we meet for special occasions and for everyday work with a laptop. The right planning of a dining room guarantees pleasant and comfortable use of the place. This group was made to emphasize the role of a dining room - also the one by a barbecue. It is perfect for a shared celebration of every meal.

Minimalistic and timeless form, solid wood of Robinia as well as solid construction make Caro furniture extraordinarily universal

and fashionable. Uniform material and visible structure of wood bring both harmony and balance to interiors as well as terraces.

The group consists of stools, benches, tables and comfortable armchairs with soft, delicate cushions serving as perfect complement. Their pastel tone perfectly interact with the colour of Robinia wood. The armchairs are easy to store as it is possible to put one into another.

By choosing Caro you will create space that is open and friendly, where every shared moment by the table will please you even more.

Color cushions  
& materials

Ripper is a set of modern furniture with unique colours. The project is based on two pillars: the form and the material. Confrontation of warm, honey Robinia and cold aluminium gives an intriguing effect: an extensive and comfortable group with slender apartment character.

The frames are made from solid, powder-coated aluminium. Such a frame not only guarantees long lasting durability but also ensures lighter armchairs and benches. Their symmetrical shapes and lack of elements that stick out is the latest trend for both interiors and gardens. Narrow strips for tops and seats serve

as perfect complements for the frames. They are made from hard European wood and ensure durability for long years.

The further elements of the group are matching armchairs and benches. Thanks to careful cambering they offer original design and comfort of seating. They are also easy to store as it is possible to put one armchair into another.

The Ripper collection will surely please the lovers of modernism and new colour sets. It looks perfect in a modern dining room or a terrace.

Giant collection is a well thought-out fusion of classical elements with modern design. Deep colour of Robinia pseudacacia with readable grain its wood versus snow-white aluminium. Such connection must be appealing. Giant is a quite universal group that fits well not only to a modern loft but also to a flat with a romantic style.

Aluminium frame ensures long lasting durability by reducing the weight of furniture at the same time. You will be pleasantly surprised how light this furniture is. Robinia pseudoacacia wood is characterized by unique resistance to changing weather conditions and beautiful noble look. Such connection guarantees the highest quality that we validate with our warranty. The furniture is tapered and does not take a lot of space- it is a collection for those who have less room for arrangement.

Giant collection offers wide variety of shapes and sizes. Sets of different dimensions allow you to practically arrange every terrace. We offer a set of bar tables and stools. Create your own home or garden drink bar! Colourful drinks and cocktails will change every evening into fantastic fun.

And when you get hungry you can look at the second part of Giant collection that consists of dining tables and benches. Choose the ones you like from a wide range of sizes and add a stool. We also offer our benchtop or a mini bar with wheels available in accessories department. And once you get hungry, let us move to the second part of Giant collection consisting of tables and dining benches.

With Giant, the space is practical and timeless. Moreover, the price of this furniture group is very attractive!

Enviably stylish. Unbeatable comfort. Muted surroundings, simplicity, a place to rest. Or maybe a variety of colors, beautiful materials, glitter and luxury? Both scenarios will make a perfect background for the Verona collection.

A unique shape, being a combination of the juicy modern with the smashing retro style, brought about an impressive effect. Thanks to an innovative approach and design closed in its form, our collection of sofas sets a new trend in garden furniture design. Verona offers a tasteful elegance, comfort, extraordinary style and climate.

It impresses with its uncommon line giving the place a character. It will become an excellent ornament in a tasteful living room, a modern hotel or on a comfortable terrace.

Verona is a collection for all moods. Excellent for a party with your friends and for a cold drink. And for all kinds of weather. Thanks to modern materials and careful finishing we came up with lounge furniture design combined with the resistance of garden furniture. In one piece.
