CALEO-ash

The Caleo Collection embodies understated luxury, blending contemporary form with timeless materials. Designed for both outdoor settings, this modular lounge series prioritizes comfort and adaptability, offering sleek, minimalist lines that define the space while providing unmatched flexibility.

Crafted with a refined Ash and Natural Teak wood frame, the collection's modularity invites creative configurations, allowing each piece to seamlessly adapt to different environments. Upholstered in soft, durable fabrics, the seating offers a tactile warmth that contrasts beautifully with the solid structure, making it a perfect blend of softness and strength. The Caleo Collection delivers an experience of serene elegance and tranquility, turning any space into a sophisticated retreat.

ÉCLAT-nightfall

Anthony Spon-Smith, a visionary in modern design, creates furniture that transcends traditional boundaries. In the Éclat Collection, he showcases his mastery in seamlessly blending form and function. Each piece, constructed with an aluminum frame and rope, achieves a perfect balance of strength and elegance. This combination not only produces visually stunning designs but also ensures durability and comfort. Spon-Smith's design philosophy is deeply rooted in a profound understanding of the spaces his creations will inhabit. His pieces are meticulously crafted to elevate environments, making them both inviting and refined. The Éclat Collection serves as a testament to Spon-Smith's unwavering commitment to excellence and his relentless pursuit of pushing the boundaries of design.

LINK-terra

When designing Link collection, Junpei & Iori Tamaki envisioned how multiple pieces placed together would create a link, and how that connection would evolve in various ways. To express Link, Junpei & Iori Tamaki believed that a design with both simplicity and distinctive, memorable features was necessary. For the central pieces of the collection, such as chairs and sofas, Junpei & Iori Tamaki adopted a design that emphasizes the contrast between the parts wrapped with rope and those without, set against a simple frame structure. This contrast creates a beauty in the balance of roughness and refinement, allowing both simple design and distinctive design to coexist. Although the table might not seem to share a common shape with the chairs at first glance, the focus on the balance of roughness and refinement ensures that, despite their different forms, a sense of link is maintained in the design.

WHALE-noche

The Whale-noche Collection has an elegant and strong design style, inspired by the whale skeleton. This special collection is designed with a unique balance of sustainable and natural materials combined with high quality Teak wood. While strong and thick lines on the vertical plane make its design clear, its structure on the horizontal plane attracts attention. In addition to its skeletal structure, wide seat details that increase comfort make the Whale Collection a comfortable experience for its users, not only aesthetically but also ergonomically. SNOC Collections with Sunbrella fabric details suitable for Natural Teak and Black Teak color options, and a coffee table designed from sand and epoxy materials; The seating and dining set and daybed are included.

MIURA-bisque

Miura-bisque Collection attracts attention with its form and knitted shells obtained by using acrylic threads of different diameters. This weave not only provides a unique look but also adds a unique tactile sensation. Miura-bisque Collection offers complementary pieces for outdoor spaces that offer solutions to different needs. Combining style and functionality, the lounge set, dining set and each piece of the collection add a different character to the environment. The collection is available in two color variations: an option suitable for natural tones in open spaces or a darker option to create a more sophisticated atmosphere. The Miura-bisque Collection not only emphasizes aesthetics, but also stands out with its versatility. These bespoke collection offers a range of options to enhance outdoor spaces with comfort, style and an impressive visual presence.

SAVIO

Born out of the wisdom of ancient archetypes, the Savio Collection is an exploration of timeless geometry through the lens of contemporary furniture and sculpture. Research into arches and columns used across millennia, informed the core principles of the Savio tables and garden lights. Through the use of digital technologies, parabolic curves and advanced manufacturing at Snoc, Patryk created sleek and supple forms that defy convention in a durable sandstone like composite. The unique textured finish of tables and lightings diffuses light giving the surface a sophisticated complexity. Savio Tables are the definitive statement piece for both indoor and outdoor living. A perfect place for large gatherings and celebrations. Light and shadow softly transition as the tables change in appearance throughout the day exposing details in the geometry. At night Savio garden and table lights illuminate space through their stored solar energy. The light reflecting from the sculpted valleys creates a feeling of warmth and safety.

LINK-bisque

When designing Link collection, Junpei & Iori Tamaki envisioned how multiple pieces placed together would create a link, and how that connection would evolve in various ways. To express Link, Junpei & Iori Tamaki believed that a design with both simplicity and distinctive, memorable features was necessary. For the central pieces of the collection, such as chairs and sofas, Junpei & Iori Tamaki adopted a design that emphasizes the contrast between the parts wrapped with rope and those without, set against a simple frame structure. This contrast creates a beauty in the balance of roughness and refinement, allowing both simple design and distinctive design to coexist. Although the table might not seem to share a common shape with the chairs at first glance, the focus on the balance of roughness and refinement ensures that, despite their different forms, a sense of link is maintained in the design.

LYORA

A delicate mid-century style, tempered by contemporary and eclectic incursions to create an elegant, but never flashy product. Simple lines, geometric shapes for a style that recalls functionality, but with class, to give every environment a touch of absolute uniqueness, elegance and why not, a pinch of history. The structure, entirely made of Teak wood, is embellished with fine workmanship to maximize its functionality and ergonomics. The collection is available in armchairs and two-seater and three-seater sofas with compact dimensions and a modular unit with enveloping lines.

MATERIALS

SNOC continues to offer collections that combine its unique design philosophy with high-quality materials, bringing together aesthetics and functionality. Each design achieves a perfect balance of aesthetics, durability, and functionality, providing a modern atmosphere in outdoor spaces. In all its collections, SNOC prefers sustainable and eco-friendly materials. This sense of responsibility reflects the mission of offering products designed not only for aesthetic appeal but also with environmental awareness.

Wicker

Wicker is a new-generation material that is highly eco-friendly due to its sustainability. It requires very little maintenance, is exceptionally lightweight, and is resistant to weather conditions, making it one of the most preferred materials for outdoor furniture.

Outdoor furniture made from Wicker is woven in a wicker style to achieve a classic outdoor look. Wicker should not be confused with natural wicker, which fades when exposed to sunlight and is generally used indoors. In contrast, Wicker furniture is highly resistant to harsh outdoor conditions.

Teak Wood

Teak is a hardwood with a high natural oil content. This makes it durable, highly resistant to rot, but also resistant to sun and rain. The combination of these properties makes Teak wood ideal for all outdoor applications. Only premium grown teak is used for the production of Snoc furniture. The features of top quality teak wood are straight grained structure, no cracks or cracks, and the only color that spreads throughout the wood. These properties combined with the high density of the wood prevent bending and rotting, ensuring that the furniture remains outside in all conditions without maintenance or preservatives. However, just like any wood species, teak is a living material and therefore temperature and humidity fluctuations can cause surface cracking and especially end veins. This is normal and does not affect the durability or strength of the wood.

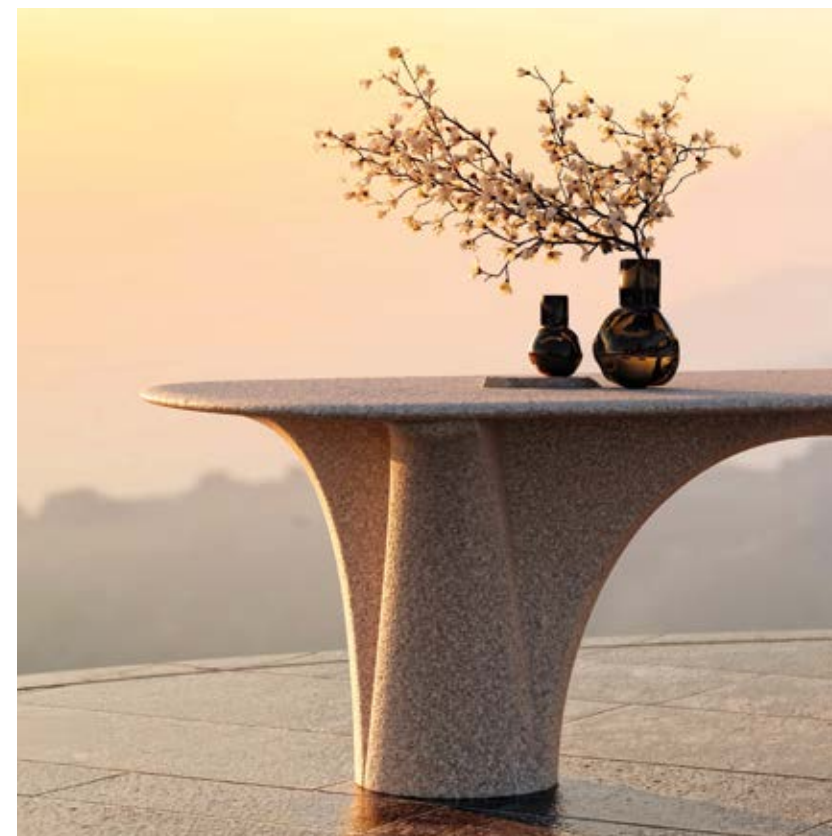

Rope

The rope is another material used in our furniture suitable for all weather conditions. Our rope-knit furniture is made of acrylic. It is environmentally friendly and recyclable. Our rope-knit furniture is designed to withstand all weather conditions like our other synthetic materials. Thanks to this high strength, you can use our rope-knit furniture in all four seasons of the year and leave it outdoors comfortably. To clean the stains that may occur on your rope-knit furniture, we recommend that you spray the soapy water solution you have prepared with the help of a spray on the relevant area and then wipe it gently with a soft cloth. Rinse the soapy water thoroughly from the product and remove excess moisture from the thread with a dry cloth. Then let it air dry. We recommend that you avoid using high-pressure water on your rope-knit furniture.

Aluminum

Aluminum material has an outstanding strength to weight ratio, and this ratio gives aluminum the feature of being a highly durable, very light, and hard metal. These properties make it an ideal material for outdoor furniture. On the surface of aluminum materials used by SNOG in its products, corrosion resistance is gained by applying the thin chrome plating process. The treated frame is then coated with electrostatic powder paint. The electrostatic application method penetrates all surfaces of the metal and creates a homogeneous surface far beyond conventional paint surfaces. The resulting surface becomes resistant to impacts, scratches, and moisture and highly resistant to corrosion.

Sandstone

Sandstone stands out as a unique material inspired by the depths of nature, shaping modern living spaces. The timeless texture of sand combines with the durability and flexibility of epoxy to offer a truly exceptional experience in both aesthetics and functionality. Sandstone has become a symbol of the fusion between natural elements and advanced technology.

During its production process, the natural color and texture of sand are preserved while being reinforced with epoxy, resulting in a highly durable and long-lasting structure. This makes it suitable for use in both indoor and outdoor settings. Sandstone's natural and warm appearance adds timeless elegance to any space, while its functional properties make it ideal for designs such as tables, coffee tables, and lighting.

Each piece of Sandstone is meticulously crafted and applied onto a skillfully constructed framework, reflecting its rich texture and flawless craftsmanship.
