WELL-BEING**

MISSION

**“WE TAILOR
LIGHTING TO YOUR
SPACES’ NEEDS,
TO CREATE
EMOTIONS AND
WELL-BEING”**

OLEV

ONLY LED
ONLY DESIGN

OLEV. Only LED, Only Design is an Italian brand of designer LED lighting fixtures.

The brand was created in 2014 by Andrea Lanaro, an entrepreneur who has been working in the lighting industry for more than 20 years.

OLEV's payoff "Only LED, Only Design" sums up the brand's focus on producing **exclusively designer LED lighting fixtures**.

We work closely with lighting designers, architects, and interior designers.

Each project aims to achieve the best solution combining LED lighting and unique design.

MISSION

WHY ONLY LED LIGHTING?

A few years ago, we decided to focus on LED technology because it lowered energy bills by up to 90% and cut maintenance needs thanks to their 50.000 hours of light.

But the evolution of LED technology didn't stop with energy savings and long-lasting products.

Today LED lights allow us to build dynamic lighting systems, designed to improve comfort in every moment of your life. That's why every lighting project by OLEV uses only LED lighting with an ambitious goal: *"Create a light tailored to people's needs, to improve well-being and heighten emotions"*. Recent research has shown that light has a great influence on our mood and health.

A light that changes according to the time of the day or to your preferences can improve your energy. It can decrease stress and help treat depression. In other words, a light tailored to people's needs and your physiology allows to **live a healthier and more fulfilling life.**

With LED technology, lighting design has changed forever. The era of the big chandelier hanging in the middle of the room is over. OLEV is a brand at the forefront of lighting, developing solutions that bring together technology, scientific studies on well-being and design.

MISSION

LIGHT FOR
WELL-BEING

Why light is not just for seeing in the dark anymore.

OLEV engaged in a research path where light is not considered just an instrument that allows to “see in the dark” anymore, but it’s a source of well-being for the people.

The newest LED lighting culture that OLEV intends to promote is tightly knit to the most advanced theories on well-being.

Thanks to the designers’ contribution, there is now the opportunity to “dress up” properly these innovative technologies, bringing to life designer elements which decorate our environments and at the same time enhance our comfort.

A FAMILY STORY

THE ORIGINS

The company was established in the 70s by Egidio Lanaro, Andrea's father, in a small town in Northern Italy. It was a family-run business building lighting fixtures and small lamps for shops. At first, the "headquarters" were based in a garage. Everything was handmade and on a small scale.

Sharing his father's enthusiasm, Andrea took over in 2000. Through hard work, remarkable ability and passion, the company started to expand under Andrea's lead.

Andrea first started experimenting with LED lighting in 2010. At the time, most manufacturers were using it mainly for industrial lighting. But he envisioned a different application of this new technology. Swimming against the tide, he started to think of a new and creative way to exploit LED lighting.

In 2014, he launched **OLEV "Only LED, Only Design" - the first brand to produce a full range of LED-based decorative lamps.** Over the years, the company has become the most important manufacturer of LED custom fixtures in the North-East of Italy. Today, OLEV is a fast-growing brand with a distribution spreading through the best designer lighting shops and lighting professionals in Italy and Europe.

THE OLEV COMPANY

**MADE IN
ITALY**

We manufacture all our lamps in our Italian factory. By keeping production in-house, we can monitor every step of the process and make sure that each one of our lighting fixtures meets our quality standards.

The handmade finishes made by our capable staff convey an exclusive artisanal touch to our decorative range.

PROJECTS

PRIVATE HOMES

The ideal interior design for a private home is always personal and carries the identity of its owner.

However, two things should never be missing from every home - the family atmosphere and a sense of well-being.

Thanks to advanced LED technology and original design, OLEV lighting grants both.

The end result is a refined environment that has a positive influence on the health and the mood of its inhabitants.

The lighting of a refined restaurant should never overlook functionality, style, and class.

The guests must be able to read the menu and see properly what they are eating. Light has to improve the experience of the guest and arouse emotions as well.

OLEV offers a range of designer lamps with a strong personality, which together with the lighting design and the decor make the setting of any restaurant unique and identifiable.

The staff itself can adjust the colour and intensity of the light or even the position of some of our lighting fixtures.

PROJECTS

HOTELS AND WELLNESS CENTRES

In the hospitality and wellness industry, it is particularly important to create a warm and relaxing atmosphere that seduces the clients and inspires them to come back again and again.

The whole environment needs to be cozy, comfortable and has to help the guests feel at ease in every setting.

OLEV's custom solutions are designed together with architects and interior designers to fit perfectly into the entire facility.

PROJECTS

CORPORATE OFFICES AND FACTORIES

Thanks to LED-based decorative lighting we discovered that it is possible to create working spaces with both strong esthetics and functional features.

The advanced LED technology we use in our lighting fixtures grants high luminous efficacy and low maintenance.

But most importantly, it helps create an emotional and physical well-being at the workplace.
