share your life

Diseños singulares,
piezas únicas
para compartir
tu vida

timeless designs

The uniqueness of the classics in harmony with the most advanced materials, the highest quality and timeless design, provide a long-lasting life to all our products.

Designed to be part of your life.

diseño atemporal

La singularidad de los clásicos en armonía con los más avanzados materiales, la calidad y el diseño atemporal, proporcionan a toda la gama de productos una larga durabilidad.

Diseñado para ser parte de tu vida.

our project

Quality is in small details.
Indecasa ensures the quality
of all its products, giving special
emphasis on small details,
to always provide the excellence
that you deserve.

nuestro proyecto

La calidad está en los
pequeños detalles.
Indecasa asegura la calidad
de todos sus productos,
poniendo especial énfasis
en los pequeños detalles,
para proporcionar siempre
la excelencia que se merece.

our mission

Passion, enthusiasm and innovation
in everything we do.

Each of our pieces is designed
with passion and enthusiasm,
characteristics that allow us to
improve year after year making a
strong effort in continuous
improvement and product innovation

nuestra misión

Pasión, entusiasmo e innovación en todo lo que hacemos.
Cada una de nuestras piezas está diseñada con pasión
y entusiasmo, características que permiten que Indecasa
año tras año ponga máximo esfuerzo en la mejora
continua y en la innovación de nuestros productos.

designers

Monica Armani / Anthea collection

Architect and designer, in 1996 Monica Armani gave life to a brilliant self-production experience: project I, which in 2005 was edited by B & B Italia. Rigorous design, innovation and engineering give life to a unique and recognizable style in all projects: from architecture to industrial design, from interior decoration to design, from design to art direction and corporate identity. Retracing the steps of the great masters, the Studio Monica Armani has chosen to devote itself with attention also to the temporary architecture, considering it a concrete and conscious answer to the sustainability needs of our time.

Joan Gaspar / Milano

Joan Gaspar: Barcelona, September 23rd, 1966

I began to learn the craft of designing under the guidance of Lluís Porqueras. In those days, towards the end of the 80s, Lluís had a small factory producing lamps in the Poble Nou district of Barcelona. At that time, prior to the 92 Olympics, Poble Nou was still a hive of industry, where companies, both large and small, as well as tiny craft workshops thrived; that formed a very valuable framework for a capital city like Barcelona

Today, I am a seasoned professional, but one who often thinks that his designs still retain the essence of those early years.

Joan Casas / Lucca, Siena, Dom, Domino, Barcino

Joan Casas i Ortinez (Barcelona, 1942) was a Catalan industrial and graphic designer who had been closely cooperating with INDECASA since the 1960s. In the beginning of his career he worked producing graphic design works and designing stands in an advertising company. Simultaneously, between 1964 and 1970, he developed a series of furniture in aluminium and stainless steel for INDECASA, which is today perceived as the classic Spanish coffee furniture. The "Barcino" chair was selected to be part of the "Catalan Designs for Export" catalogue from the BCD.

Jorge Pensi / Toledo, París

JORGE PENSI DESIGN STUDIO was set up in 1984 in Barcelona's Gothic quarter, specialising in furniture and lighting design, the visual image of its products and staging for different types of events. Since then the studio has consolidated its position as a global point of reference for contemporary design. Its minimalist and expressive designs have received numerous prizes and awards. Some of its first products, such as the Toledo chair or the Regina lamp, have since become Spanish design icons. In 1997, Jorge Pensi was awarded the National Design Prize by the Ministry of Industry and Energy and the BCD Foundation for outstanding professional achievement.

Jordi Ribaudí / Espiga, Dunas

Degree in Industrial design

In 1996 he founded Estudi Ribaudí, specialized in product design and lighting.

Also collaborates with well-known fashion brands in the creation of brand image and spaces.

Is one of the promoters of REC.0 Experimental Stores.

A project that was born to recover an industrial architecture of a neighborhood called Rec, with the installation of pop-up stores.

In 2016, launched his own producing company on furniture, Toru.

Antoni Tarrés / Sàlvora

His career has always been focused on creating, developing and launching new products and services.

Antoni Tarrés is a multifaceted designer with a strong academic background. He has managed innovation projects in multiple sectors -transports, electronics, furniture, packaging, visual communication- and has worked with renowned companies as a manager or consultant. Passionate about illustration and photography, in his career, it has always been room for more speculative projects and for teaching in design schools.

Kurt Thut / Alu4

Kurt Thut's was a grand master of Swiss furniture design thanks to exceptional talent and two concise convictions that he remained true to throughout his life: a piece of furniture needs to be clearly justified. And a design is only good if it is kept simple and straightforward. After completing his carpentry apprenticeship and a degree at the Art and Design College in Zurich, he joined his father's carpentry business and turned it into a breeding ground of excellent Swiss design. Thut worked simultaneously as a designer, developer, design engineer and producer and made furniture that creates a positive impression thanks to its timeless and distinctive design.

anthea

by
monica armani

Color; solutions for innovative textiles, the figure for my design are the ingredients for this new outdoor collection. Sofas, wide armchairs, seatings, an innovative pool bed, completed by a range of tables, side and coffee tables. All creating Monica Armani's "world" for Indecasa. My work focuses on creating harmony between form, research and timeless design. The ANTHEA collection is the result: the backrests of the seatings are covered with an elastic strip which I dignified with a textile ribbon of my design. The three-dimensional effect and the chromatic vibration therefore create an innovative and unique detail.

ANTHEA is built with aluminium, a material which is both valuable and mouldable. For the objects in this collection I designed dedicated extrusions and a series of components for the die casted junctions and legs. I then worked with the tube to realize the backrests and the pool bed. This material, with its characteristics, represents the DNA of Indecasa. The Spanish company, in its prestigious history, created iconic objects in aluminium. Working on this collection, which represents a new journey for Indecasa – my choice of material was therefore apparent – enabled me to create a series of details which together make ANTHEA recognizable and unique. ANTHEA was born in the sun. The wide range of choice in pastel colors and textile combinations enable to create numerous moods which can adapt to any kind of situation and atmosphere.

El color, las soluciones para innovaciones textiles, y la forma de mi diseño son los ingredientes para esta nueva colección de muebles de exterior: Sofás, amplios sillones, sillas, y una innovadora hamaca, completados con una amplia gama de mesas, mesa lateral y mesita de café, crean el "mundo" Monica Armani para Indecasa. Mi trabajo se basa en crear armonía entre las formas, la innovación y el diseño atemporal. La colección ANTHEA es el resultado: los respaldos de los asientos están cubiertos con tiras elásticas y enriquecidas con una cinta tejida de diseño propio. El efecto tridimensional y la vibración cromática crean un detalle vanguardista y único.

ANTHEA está construida en aluminio, un material valioso y moldeable. Para las piezas de esta colección, he diseñado las extrusiones – hechas a medida – así como una serie de componentes para las articulaciones y la estructura de fundición. Posteriormente, trabajé la estructura de los respaldos y de la hamaca. Este material, con sus características, representa el ADN de Indecasa. La compañía española, a lo largo de su prestigiosa historia, ha creado objetos icónicos en aluminio. Trabajando en esta colección, que representa una nueva etapa para Indecasa – mi elección del material fue, por lo tanto, evidente – permitiéndome crear una serie de detalles que, en su conjunto, hacen que la colección ANTHEA sea reconocible y única. ANTHEA nació bajo el sol. El amplio abanico de posibilidades en colores pastel y las distintas combinaciones de tejidos permiten crear múltiples ambientes que pueden adaptarse a cualquier situación y atmósfera.

espiga

by
jordi ribaudí

Espiga, its name defines it. Merging the functional with the emotional. Recovering and highlighting what is useful and beautiful in our culture to create a striking collection due to its attractive geometric and organic rhythm. It reflects the ancient way of weaving which has always been there, primitive, simple, intimate and at the same time intelligent.

Elegante, versátil, hacen de esta colección perfecta para cualquier ocasión. Espiga, su nombre la define. Fusionar lo funcional con lo emocional. Recuperar y hacer visible lo útil y lo bello de nuestra cultura para crear una colección que sorprende por su atractivo ritmo geométrico a la vez que orgánico. En ella se refleja esa ancestral forma de tejer que siempre ha estado ahí, primitiva, sencilla, cercana y a la vez tan inteligente.

dunas

by
jordi ribaudí

Dunas is a collection of rounded and friendly lines designed to adapt to all environments and climates. With its youthful forms, Dunas offers versatility and modernity able to fit in the most unsuspected places

Dunas es una colección de líneas redondeadas y amables diseñada para adaptarse a todos los entornos y climas. Con sus formas juveniles, Dunas ofrece una versatilidad y modernidad capaz de encajar en los lugares más insospechados.

milano

by
joan gaspar

Milano, a sober, elegant and versatile line, gives a distinguished touch to any space. The delicate style and maximum durability of this collection make it adaptable to different and unique environments.

Milano, de línea sobria, elegante y versátil, confiere un aire distinguido a cualquier espacio. El estilo delicado y la máxima durabilidad de esta colección permiten su adaptación a entornos diferentes y singulares.

A photograph of a swimming pool deck. The deck is made of light-colored wooden planks. A dark lounge chair is on the left, casting a shadow. The pool is on the right, with a white lane line and blue mosaic tiles. The water is clear and blue. The word 'lucca' is written in white in the top right corner.

lucca

by
joan casàs

Lucca es una colección versátil, elegante, con dimensiones y acabados diferentes en sus distintas variantes. Con materiales nobles y de una durabilidad máxima. Diseñada para satisfacer las exigencias más lujosas, un diseño atemporal que se distingue por su elegancia en cualquier espacio.

siena

by
joan casàs

The Siena chair stands out due to its light and transparency. Comfort and ergonomics for cozy environments where it is crucial to take full advantage of the space. A versatile design with indisputable elegance and comfort

La silla Siena se distingue por la luz y la transparencia. Confort y ergonomía para ambientes acogedores donde el aprovechamiento del espacio es fundamental. Diseño versátil y de indiscutible elegancia y comodidad.

dom
+ domino

by
joan casàs

The series Dom tables denotes strength and design. Their clean and well-defined lines provide elegance and sobriety to any space.

Domino is elegance in aluminum, with soft and compact lines, giving off character and simplicity. Available in different sizes, they can work in any space.

La serie de mesas Dom significa fortaleza y diseño. Sus líneas limpias y bien definidas son capaces de brindar elegancia y sobriedad a cualquier espacio.

Domino es elegancia en aluminio, de líneas suaves y compactas, desprenden carácter y sencillez. Presentadas en diferentes medidas, se adaptan a cualquier espacio.

sálvora

by
antoni tarrés

Sálvora is the name of a small island on the Atlantic coast, considered to be a sacred place by ancient Celtic settlers. Sálvora is a sun lounger with an island outline. A simple, compact, comfortable, strong and desirable line, with incomparable elegance.

Sálvora es el nombre de una pequeña isla de la costa atlántica, considerada lugar sagrado por los antiguos pobladores celtas. Sálvora una tumbona con silueta de isla. Una línea simple, compacta, cómoda, robusta y deseable, con una elegancia incomparable.

Sofás, butaca y puf: bastidor/plataforma diseñado y realizado en aluminio extrusionado, con uniones realizadas mediante fundición a presión; capas de tejidos Batyline, tono sobre tono, crean el soporte de los asientos tapizados.

El sistema de patas a puente, en fundición a presión, completa las bases, que pueden ser simples o compuestas. Una serie de respaldos lineares, decorados por bandas” a “L”, a “C”, permiten configurar sofás con dos y tres plazas, y el sillón y los sofás modulares en todas las formas.

Poolbed: realizado con un único tubo y redondo en acero inox, creando la estructura para la tumbona en Batyline, se inclina bajo el respaldo para crear el punto de apoyo, el bastidor y el soporte. El respaldo en forma está acolchado y tapizado en tela.

Sillas y sillón: las patas en tubo de aluminio están soldadas a una placa estructural conectada a la cesta/respaldo “con bandas”. Una silla acolchada estructurada crea el asiento y rompe las tiras laminadas de las espaldas, creando un detalle particular para estas sesiones.

Mesas, mesa lateral y mesa de centro: las estructuras están fabricadas con un bastidor en aluminio extrusionado y uniones fundidas; las patas del puente también son realizadas mediante fundición a presión. El diseño incorpora los detalles del sistema de sofás. Los sobres están realizadas en compacto laminado o en cristal templado.

Sofas, armchairs and poufs: frame/platform realized with an aluminium extrusion and diecasted junctions, tesano layer in Batyline, tone on tone, creating a stuffed seating. The diecasted bridge leg system completes the base that can be single or mounted with each other. A series of covered backseats, L or C shaped, enable to configure two or three seat sofas, both the armchair and the sofa are modular in all forms.

Poolbed: realized with a round inox tube, worked continuously, that creates the structure for the Batyline small bed and tapers under the pivoting backrest to create its fulcrum, the rack and the support. The shaped backrest is padded and covered in textile.

Chairs and armchairs: the aluminium tube legs are welded on a structural plate connected to the covered backrest. A structured padding creates the seating and is in direct contrast with the prestigious backrests, creating a peculiar detail.

Tables, side tables, coffee tables: the structures are realized with an aluminium extruded frame and diecasted junctions, the bridged legs are also diecasted. The design recalls the detail used for the sofa system. The planes are realized in laminated compact or tempered glass.
