NATURE COLLECTION

NATURE dining table & bench - BISTRO director chairs

NATURE dining table & bench

NATURE

Nature collection comprises a complete dining setting as an eye catcher to your garden. The beauty of raw teak makes every piece unique with an irregular touch. No table top or bench is the same. The sleek design of its powder coated aluminium frame and the solid table top with rough finish makes your setting timeless to enjoy the outdoors with family and friends for many years to come. Choose a table top of 280 or 350 cm, whatever fits your environment best. All teak tops have a thickness of 50 mm. Complete your setting with the Nature bench with the same length of your table or combine with armchairs of your preference from another collection.

MATERIALS

FRAME
